

# SEALES MAIZE SILAGE BALANCER

Maize silage is a high quality forage supplement. However, it is particularly low in Sodium (Na), Calcium (Ca) and Phosphorus (P), and can be used as an effective carrier to supplement cows with Magnesium (Mg). Seales Maize Silage Balancer can be used as a cost effective means of adding essential minerals to an animal's diet especially when maize silage is a significant component of the diet, during summer and autumn. Seales Maize Silage Balancer has been developed with this in mind.

## INGREDIENTS

Lime	50%	Broll	17.5%
Magnesium Oxide	17.5%	Salt	15%

## HOW DO I USE THIS PRODUCT?

Seales Maize Silage Balancer is designed to be added to silage at the rate of 200gms/hd/day when feeding 4 kg of maize silage/hd/day. This is 1 x 25kg bag per 125 cows per day.

### **This will provide the animal with:**

Lime 100 grams    Magnesium Oxide 35 grams    Salt 30 grams    Broll 35 grams

## COMMENTS

- 25 kg bags (40 bags per tonne)
- Ideal supplement when using maize silage to balance mineral deficiency
- Rumensin can be added upon request
- Top quality product from NZ's leading manufacturer of custom blended stock feed
- If using maize silage during summer the animals protein intake may be deficient unless balanced with a high protein meal

*All information is presented in good faith using a globally accepted computer matrix, however, variation in values and the outcome of feeding this product may occur.*
