

IMPROVE GROWTH RATES WITH SEALES AND LEVUCELL SC

Levucell SC aids in the establishment of a healthy rumen microbial population, encouraging the growth and development of rumen papillae and improving digestion of solid feed.

ADD LEVUCELL SC TO YOUR SEALES PREMIUM GOLD CALF PELLETS TO HELP:

- ◆ Promote early rumen development
- ◆ Improve daily liveweight gain
- ◆ Improve feed conversion efficiency
- ◆ Reduce animal health costs
- ◆ Reduce the risk of digestive upsets at weaning

“GET OVER TO SEALES”

Available in the North Island EXCLUSIVELY FROM SEALES PERFORMANCE STOCKFEED Levucell SC is an extremely stable live yeast which scavenges oxygen in the immature rumen of the young calf, helping to speed up the maturation of the rumen flora. The pH stabilising effect of Levucell SC helps encourage the establishment of a more diverse rumen population and eases the transition from milk to solid feed at weaning.

WHAT PERFORMANCE IMPROVEMENTS CAN BE EXPECTED?

Trial work has shown increased daily weight gain, improved feed conversion efficiency ratios and reduced medication costs for calves fed Levucell SC compared to control groups.

Location	No. of animals	Duration (days)	Increased production
Spain, Field trial (1996)	258	54	+74g/day (+7.3%)
USA, UC Davis Vet School (2003)	24	81	+13.5kg at 88d (+14.5%)
Italy, Uni. of Milan (2008)	96	90	+130g/d (+14.3%)
