**Magnesium Oxide is a magnesium supplement to aid in the prevention of hypomagnesia (magnesium deficiency) in cattle.**

**Magnesium supplementation can assist in the prevention of milk fever and grass staggers.**

**Seales Performance Stockfeed Magnesium Oxide is available in convenient 25kg bags.**

### **DIRECTIONS FOR USE:**

#### **PASTURE DUSTING:**

Apply to pasture at 46-77 grams per cow per day

#### **ORAL DRENCHING:**

Administer 24-38 grams per cow per day depending upon animal requirements. NB: Mix 1kg Magnesium Oxide to 3 litres of water and stir thoroughly

#### **ADDING TO SUPPLEMENTARY FEED:**

Include in mixed rations (or pelletised feed) at a rate to ensure each animal will receive 24-38 grams of Magnesium Oxide per day depending upon animal requirements.
